Internship & Job Portal System

Problem Statement

The traditional recruitment process often involves manual job postings, paper-based applications, scattered communication, and inefficient applicant management. Job seekers frequently struggle to find suitable opportunities, while companies face difficulties in screening candidates, tracking applications, and managing recruitment workflows efficiently.

Furthermore, the absence of a centralized platform results in delayed communication, poor candidate experience, lack of transparency in application tracking, and increased administrative workload.

To address these challenges, a web-based Internship & Job Portal System is required to provide a centralized, secure, and efficient recruitment platform where job seekers and recruiters can interact seamlessly. The system will streamline the entire recruitment lifecycle, from job posting and application submission to candidate selection and hiring.

Objectives

General Objective

To develop a secure and efficient web-based Internship & Job Portal System that simplifies the recruitment process by connecting job seekers with employers through a centralized digital platform.

Specific Objectives

1. To provide a centralized platform for internship and job recruitment.
2. To enable students and job seekers to create professional profiles and upload resumes.
3. To allow recruiters to publish and manage job and internship opportunities.
4. To simplify the application submission and tracking process.
5. To facilitate communication between recruiters and applicants.
6. To provide interview scheduling and application status management.
7. To generate recruitment-related reports and analytics.
8. To implement role-based access control for different user types.
9. To improve recruitment efficiency by reducing manual processes.
10. To ensure secure handling of user information and application data.
11. To provide email notifications for important recruitment activities.
12. To maintain activity logs and recruitment history for monitoring purposes.
13. To support search and filtering mechanisms for better opportunity discovery.
14. To enhance transparency in the hiring process through real-time application tracking.

15. To create a scalable platform that can support multiple companies and thousands of applicants simultaneously.

Project Description

Internship & Job Portal System is a web-based recruitment platform designed to connect job seekers with companies in a centralized digital environment. The system allows students or applicants to create professional profiles, upload resumes, search for jobs and internships, and apply directly through the platform.

On the other hand, companies can register, create job postings, manage applicants, and track recruitment processes efficiently. The system also includes an admin panel for managing users, verifying companies, monitoring activities, and generating reports.

The platform ensures a structured recruitment workflow by providing features such as application tracking, status updates, messaging between recruiters and applicants, and automated email notifications. Overall, it aims to simplify and digitize the hiring process in a secure and efficient manner.

Actors

1. Student / Job Seeker
2. Company / Recruiter
3. Admin

Student Requirements

User Requirement 1: Student Registration and Authentication

System Requirements

- The system shall allow students to register using a valid email address.
- The system shall verify email addresses before account activation.
- The system shall securely store encrypted passwords.
- The system shall provide password reset functionality.

Functional Requirements

1. Student creates an account.
2. System sends verification email.

3. Student verifies account.
4. Student logs in successfully.
5. Student can reset forgotten passwords.

User Requirement 2: Profile and Resume Management

System Requirements

- The system shall allow students to maintain professional profiles.
- The system shall support profile image and CV upload.
- The system shall store education, skills, and experience information.

Functional Requirements

1. Student updates profile information.
2. Student uploads profile picture.
3. Student uploads CV/Resume.
4. Student adds educational qualifications.
5. Student adds skills and experiences.
6. System calculates profile completion percentage.

User Requirement 3: Job and Internship Search

System Requirements

- The system shall display all available jobs and internships.
- The system shall support search and filtering.

Functional Requirements

1. Student browses available opportunities.
2. Student searches by title, company, or keyword.
3. Student filters opportunities by category and location.
4. Student views detailed job descriptions.

User Requirement 4: Job Application Management

System Requirements

- The system shall allow students to apply for jobs.
- The system shall maintain application records.
- The system shall track application status.

Functional Requirements

1. Student selects a job.
2. Student submits an application.
3. System records application details.
4. Student views application history.
5. Student tracks application status.
6. Student withdraws application if necessary.

User Requirement 5: Communication and Notifications

System Requirements

- The system shall support communication between recruiters and applicants.
- The system shall generate notifications for important activities.

Functional Requirements

1. Student sends messages to recruiters.
2. Student receives recruiter responses.
3. System sends application status notifications.
4. System sends email notifications.

Recruiter Requirements

User Requirement 1: Company Registration and Profile Management

System Requirements

- The system shall allow company registration requests.
- The system shall require admin approval before activation.
- The system shall support company profile management.

Functional Requirements

1. Recruiter submits company registration.
2. Admin reviews the request.
3. Approved company gains access.
4. Recruiter updates company information.
5. Recruiter uploads company logo.

User Requirement 2: Job Posting Management

System Requirements

- The system shall allow recruiters to create and manage job postings.
- Each job posting shall have a deadline and requirements.

Functional Requirements

1. Recruiter creates a job post.
2. Recruiter specifies requirements.
3. Recruiter sets application deadline.
4. Recruiter updates job information.
5. Recruiter publishes or removes job postings.

User Requirement 3: Applicant Management

System Requirements

- The system shall provide access to applicant information.
- The system shall support applicant filtering and status management.

Functional Requirements

1. Recruiter views applicant list.
2. Recruiter reviews applicant profiles.
3. Recruiter downloads resumes.
4. Recruiter shortlists candidates.
5. Recruiter rejects unsuitable applicants.
6. Recruiter updates application status.

User Requirement 4: Recruiter Communication

System Requirements

- The system shall allow recruiters to communicate with applicants.
- The system shall maintain communication history.

Functional Requirements

1. Recruiter sends messages.
2. Applicant receives notifications.
3. Recruiter schedules interviews.
4. Communication history is stored.

Admin Requirements

User Requirement 1: User Management

System Requirements

- The system shall provide complete user management facilities.
- The system shall allow account activation and deactivation.

Functional Requirements

1. Admin views all users.
2. Admin creates accounts if necessary.
3. Admin updates user information.
4. Admin blocks suspicious accounts.
5. Admin deletes inactive accounts.

User Requirement 2: Company and Job Approval

System Requirements

- The system shall verify companies before allowing job publication.
- The system shall moderate job postings.

Functional Requirements

1. Admin reviews company requests.

2. Admin approves or rejects companies.
3. Admin reviews job posts.
4. Admin approves or removes jobs.

User Requirement 3: Monitoring and Reporting

System Requirements

- The system shall maintain activity logs.
- The system shall generate analytical reports.

Functional Requirements

1. Admin views application statistics.
2. Admin monitors user activities.
3. Admin generates recruitment reports.
4. Admin exports reports as PDF.
5. Admin views dashboard analytics.

User Requirement 4: System Security

System Requirements

- The system shall implement role-based access control.
- The system shall secure sensitive information.
- The system shall maintain audit logs.

Functional Requirements

1. Admin manages roles and permissions.
2. System encrypts passwords.
3. System records user activities.
4. Admin monitors security events.

Non-Functional Requirements

1. Secure Authentication and Authorization.
2. Password Encryption using Laravel Hashing.

3. Responsive Design for Mobile and Desktop.
4. Fast Search and Filtering Performance.
5. Browser Compatibility.
6. Reliable Database Storage.
7. Secure File Upload Management.
8. Scalable Architecture.
9. High Availability.
10. User-Friendly Interface.
